

**THE HOME OF QUALITY SHELTERS**

---

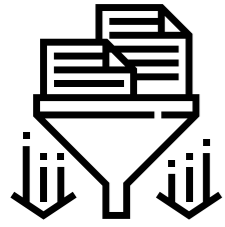

# INTRO

**BC Shelters are a specialist team of designers, fabricators and installers dedicated to producing high quality bespoke structures for civil, commercial and industrial use.**

We have a wealth of experience designing, producing and installing modular & bespoke structures to compliment any environment. Urban or Rural we strive to create a structure designed for purpose and built to last.

BC Shelters put the customer first no matter what the situation; we design and manufacture our shelters to suit your needs, having our own in house design team means that we can give you a clear insight into how your product will look before it's ever been fitted. One of the many benefits to ordering a shelter from us, is that our aluminium shelters come with a 10 year warranty.

Since the time that BC Shelters was founded we have become a well known company for our reliability, our quality of work, commitment to customer satisfaction and our competitive prices.

# OUR CLIENTS

Our client base varies from Parish Councils, County Councils, to world renowned brands and the NHS. We have also worked with many of the UK's largest contractors such as Balfour Beatty and Kier Construction.

We have gained a wealth of experience in many different sectors and are now able to implement that into future work wherever that may be. No matter what the size of the project, we are adamant we can complete it to your satisfaction.

# OUR SAFETY

At BC Shelters we thrive to be at the forefront on Health & Safety in the workplace. We make sure to keep up to date on any licences or certificates that the company or individuals of the team need, such as Street Works, CSCS, Pasma and QMS.

BC Shelters is committed to the **CPD** (Continuing Personal Development) of our employees by training staff to the required level of achievement to perform their job. At BC we believe that the ongoing success of our company and our community starts by helping all of our employees get the qualifications they deserve.

We offer a FREE on site consultation in which we can talk to you personally about the safety elements of your chosen site, and work through the risk assessment and provide a method statement for your project.

# OUR ACCREDITATIONS

**CHAS** is established as the market leader for health and safety pre-qualification in the UK. It is available to suppliers (those who provide goods and services) and to organisations (buyers) looking for suitably competent suppliers.

**ISO 9001** Certification is suitable for all sizes and types of organisations and is well established around the world as an invaluable Quality Management System standard. The process encompasses the entire organisation and requires senior management buy-in, it is not just a function of the Quality Department. To achieve ISO 9001 Certification your organisation needs to demonstrate that it can meet the regulatory requirements and apply the system effectively to be of real benefit to our Customers.

**Constructionline** is the UK's leading procurement and supply chain management service that collects, assesses and monitors standard company information through a question set that is aligned to PAS 91, the standardised pre-qualification questionnaire developed by BSI to reduce duplication within the construction industry.

We are accredited by **City & Guilds**, Under the New Roads and **Street Works Act 1991**, the installation, renewal, maintenance and inspection of underground apparatus in any street or road must be under the control of competent people.

# BUS SHELTERS

**We have a wide range of Bus Shelters available, designed to accommodate people and keep them safe and dry. Traditional or modern designs, we will find a shelter that complements any environment and location setting. We endeavour to install within three weeks, dependant on work installation schedule - to anywhere in Mainland UK, We are recognised by many Councils as the market leaders in the design & installation of bus shelters across the UK.**

We have built our reputation on our willingness to supply not only 'one off' shelters but also large national companies and inner city projects with multiple orders.

Our Bespoke Bus Shelters can be designed to include lighting and PIR units, guttering & drainage systems to ensure rainwater is directed away from the shelter. The versatility of our shelters means they can be adapted to meet any of your exacting requirements including Real Time Information Display Units.

Our team can discuss your project with you, as we can offer a consultation with each client regarding their specific requirements, we want you to become a part of the process, therefore we will keep you up to date with our nine point design process, which will guide you right through to the installation, All our customers benefit from the same expert help and advice.

# WAITING SHELTERS

As part of the Safe Routes to School initiative, schools with travel plans in place may be eligible to receive government grants, and one of the items in the scope of this grant is a dedicated shelter for waiting parents. Alternatively, waiting shelters can be used by construction companies, offices and retail parks.

Waiting Shelters are there for when customers, clients or the general public need a space to queue, or wait for a service.

BC Shelters have been working within schools and nurseries for years and all our team, be it in the sales office or out on the field, have been DBS checked. Please remember we also offer a free site survey for your peace of mind, which can potentially save you money.

After a detailed consultation with each client regarding their specific requirements, our drawing team can produce an individual 3D drawing or a 3D render designed to meet all your requirements and allowing you to have considerable input into the finished product.

# JET WASH SCREENS

**Jet Wash Screens offer protection from one bay to the other, stopping potential grime, dust and sharp objects being sprayed from one bay to another. For this reason we have developed these Jet Wash Screens and enclosures as it is an effective and relatively cheap way of ensuring that there will be no complaints from your customers or employees when they are maintaining their vehicles.**

These structures are made out of aluminium and steel which is very durable and has a long shelf life. The frames are powder coated so the structure does not have to be repainted and is very low maintenance.

The structure is very light and the screens can be repositioned easily if you need to redesign your space in the future.

All products on our website are manufactured by us with the help of the latest machinery. When you visit our site you will see examples of screens that were erected by us for other clients, you can use these as a guide for your own use, as we can design your car wash bay to your specifications.

Apart from side screens you might also want to install a roof to your space in case of foul weather. In this case we would suggest corrugated roof panels. For extra light, a clear panel can help boost lighting conditions, without the need for external lighting systems, however we can supply lighting configurations if you feel that your project needs a lighting system installed.

Please remember we offer a FREE no obligation site survey for your peace of mind.

WE HAVE A RANGE OF OPTIONAL EXTRAS  
& ACCESSORIES TO CUSTOMISE YOUR PRODUCT

# CANOPIES & WALKWAYS

**If you've been wondering how to make the most out of your outdoor spaces, we can help you focus your thoughts. Your grounds are a fantastic and frequently underused resource. We recognize space in schools and public spaces is at a premium and we have a solution to the problem.**

Walkways are also ideal solution if you are looking to link buildings together as they are designed to keep occupants dry and safe from the elements of the weather and also provide protection from the harmful rays of the sun, using UV stable polycarbonate and aluminium sheet glazing.

Walkways and canopies can be designed to include lighting and PIR units and guttering systems to ensure rainwater is directed away from the shelter.

Please remember we offer a FREE no obligation site survey for your peace of mind.

# CYCLE SHELTERS

**Say goodbye to congestion, rising fuel costs and irregular public transport. Bike it! We manufacture a range of modern and affordable cycle shelters to keep cycles safe and protected from the weather.**

The versatility of our shelters means they can be adapted to meet any of your requirements for any business or education outdoor space that needs a bespoke design to fit the area.

Very popular in schools and commercial offices, our shelters can be designed for both cycles, scooters and motorcycle storage.

In addition to our cycle shelters we can also manufacture compounds which can be fully enclosed with locking doors and roof to provide added security.

# MACHINE SHELTERS

**BC Shelters makes machine covers for all types of machinery, from small weather covers to large machine covers. Our covers not only protect your expensive machinery, but also provide shelter for those who work with and operate them.**

From small ticket machines in car parks across the country to large scale machinery in factories, our shelters can extend the life of your machine or tooling from the unpredictable British weather.

As the complete manufacture process is performed in-house, we can ensure the price you pay is the most competitive available.

We can complete a site survey for you, to ensure that the machine or tooling you have will fit underneath your new shelter. The Shelters can be open, fully enclosed or a bespoke configuration to suit you.

EMAIL US ON: [INFO@BCSHELTERS.CO.UK](mailto:INFO@BCSHELTERS.CO.UK)

# SMOKING SHELTERS

BC Shelters has been manufacturing smoking shelters for many years having supplied to many large sites such as Honda, Jaguar, Landrover, BAE systems etc.

All smoking shelters are supplied to ensure that they are fully compliant with current smoking legislation and can be located wherever is suitable for your requirements.

The shelters can range in size depending on the floor space you have or the amount of people you wish it to hold, a site survey with our advice can determine the sizes for you within your budget.

Our range comes in a variety of modular, standard systems or if you are requiring a bespoke design, our design team can design something based on your location and price range.

WE HAVE A RANGE OF OPTIONAL EXTRAS & ACCESSORIES TO CUSTOMISE YOUR PRODUCT

# OUTDOOR LEARNING

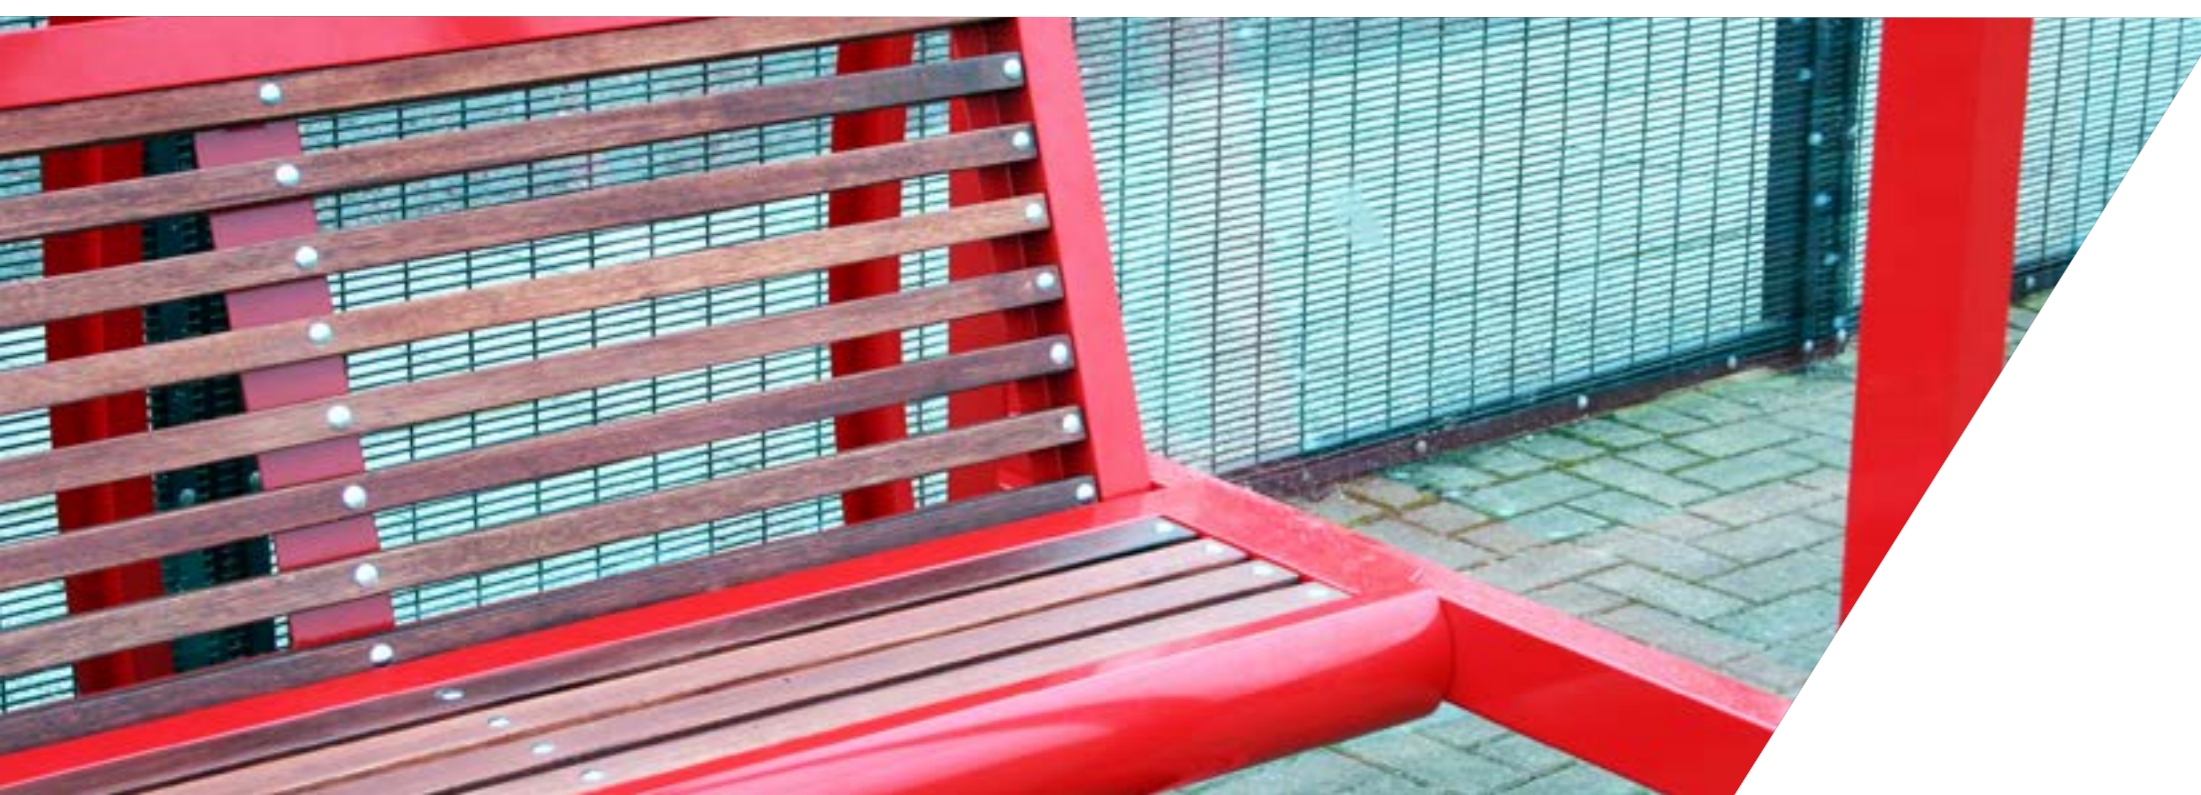

**Improve the environment for children and staff alike, ensuring a better, happier place to be and developing a positive, caring ethos. Provide an environment for physical activity, improving health, well-being and motivation to learn.**

An outdoor space which is safe, secure, robust and requiring little or no maintenance. Flexible in design to meet your exacting requirements for children to work, learn & play in such as:

- Outdoor Teaching Area
- Dining Area
- Quiet Area
- Children's Playground
- Parent Waiting Area

Children's safety comes first and if required we can fit padded post protectors to the legs of the canopy, they are waterproof and easy to clean they come in a range of bright and fun colours to complement your school. The roof of the shelter is glazed with UV stable polycarbonate to protect the children from the harmful UV rays of the sun.

Please remember we offer a FREE site survey for your peace of mind.

## SPORTS SHELTERS

**BC Shelters can supply Sports shelters for local initiatives right up to premiership clubs, for activities as diverse as football, rugby, hockey and athletics. Our in house design and manufacture facility means we can come up with a bespoke solution for you, whatever your shelter requirements.**

We are proud to have worked recognised clubs such as Liverpool Football Club, at their training facility in Kirkby, and we have worked with local clubs such as Southport Football Club installing a large disabled shelter for their supporters.

We make our shelters with a bronze tinted UV stable poly carbonate to the roof, providing users with a comfortable environment with protection from harmful

rays from the sun. 180 degree visibility allowing occupants to see action at both ends of the ground. Side glazing is of clear polycarbonate giving maximum visibility. Our profiles are specifically designed for the outdoor environment

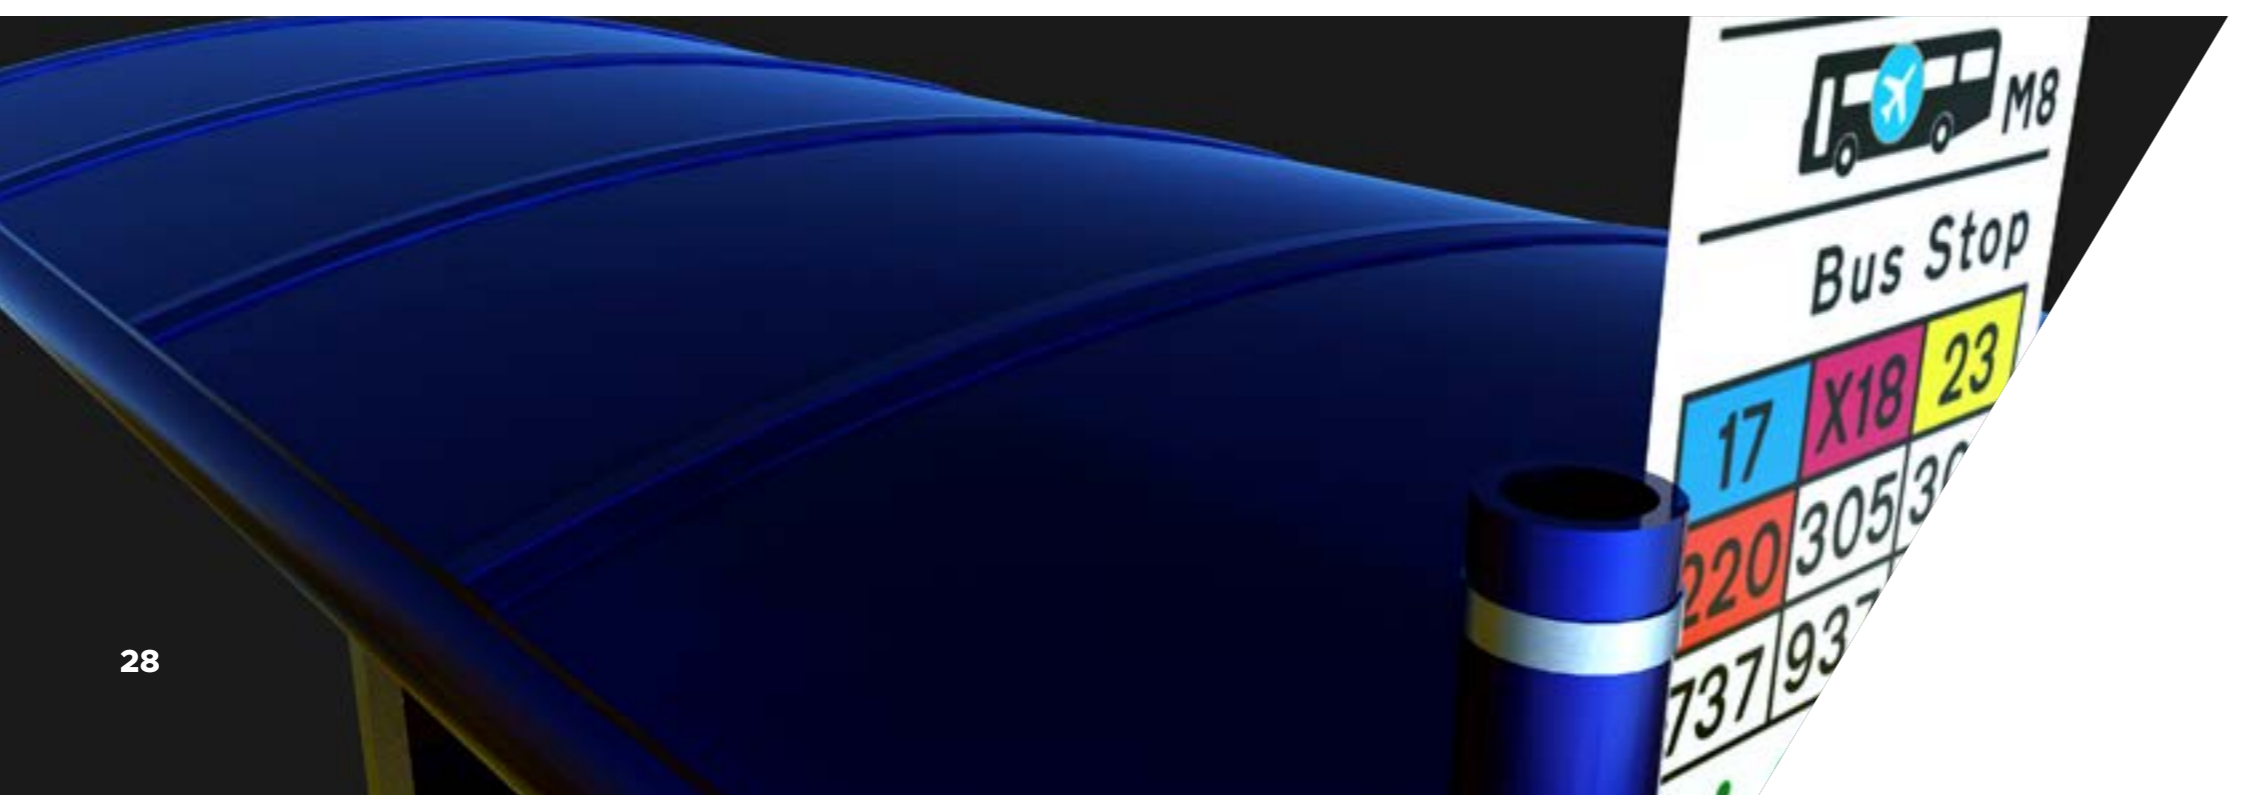

# PRODUCT DESIGN & ENGINEERING

**From concept to completion – we are on hand every step of the way to ensure your full satisfaction. We can offer a 3D image of your proposed shelter in situ, aswell as structural calculations at an extra cost for your product which can be great for meetings and planning applications.**

Our design department can produce an individual fully rendered 3D image designed to meet all your requirements and allowing you to have considerable input into the finished product, the 3D Model can be used as a visual aid during the design process, and specialist renders can be produced to highlight the detail of the structure.

If you have a digital camera or mobile phone, take a few landscape shots of your proposed area then email them to us. Don't forget to include all your contact details including post code of the proposed site so we can get it up on Google Maps, also any miscellanea which could help us get a full understanding of what you need.

BC Shelters can offer a wide variety of optional additions to enhance your product you have purchased, from litter bins to flagpoles, optional accessories can add that premium feel to the location.

**Flag Brackets & Poles** - In a range of sizes and colours to match your shelter.

**Information Boards** - Timetables for your local bus routes

**Bench Seating** - Durable quality benches

**Perch Seating** - Attached to the interior of your shelter for passengers.

**Mains Lighting** - For safety at night

**Solar Lighting** - For use in rural locations or for Eco-friendly cities and companies

**Solid Lower Panels with Fret Work** - Customise your bus or waiting shelter to fit within your theme by adding extra framing or fret work

**Signage** - Advertisement boards can be fully fitted within our shelters to offer you space or posters for adverts or events within your community.

# FAQ's

## Why should I choose to purchase from BC Shelters and not from one of your competitors?

BC Shelters cater a package to suit your specific needs, we manufacture, design and install (if you request installation) to help make your job as simple and hassle free as possible. Our Aluminium Shelters come with a 10 year guarantee and are corrosion free. We also offer like for like quotations against other company quotes.

## How long does it take to get a shelter manufactured and installed?

We normally require three working weeks but under specialist circumstances we will always try to get our installation dates to suit your requirements. Bespoke installations can take longer depending on the size of your project.

## What colours can I choose?

We can paint the shelters to most RAL colours. Feel free to speak to an advisor who will be able to help you further on picking the colour of your shelter.

## How do you install your shelters?

We CAT scan to a site specific depth before any installation, which will highlight any underground utilities. Our bus shelters are installed into concrete pockets; they will then be backfilled with the current surface material.

## What sizes do your bus shelters come in?

We can design a bespoke package for your own specific needs, we have experience in making both big and small shelters so you can rest assured knowing we will create the shelter specifically for where you need it to go.

## What guarantee do you have?

We have a 10 year warranty on all of our aluminium shelters.

# TESTIMONIALS

BC Shelters have proven to be a team that are able to seamlessly translate outline ideas in to designs while working to strict deadlines. They have worked on a growing number of specialist shelter and electric vehicle schemes with us and each time have proven to be exceptional in delivering cost effective solutions with a great product. I will look forward to working with them in the years ahead.

- **DANIEL MULLINS - CONTRACT MANAGER - RINGWAY, EAST MIDLANDS**

ON Power Company provide 75,000 homes with energy. They are the main source of 100% renewable energy in Iceland. When they were looking for shelters for their car charging stations they chose shelters from BC Shelters in England. They have been very impressed with the quality of the shelters which will be installed all around Iceland in the upcoming months.

- **JÓHANNES F. JÓHANNESON - MERKING EHF - REYKJAVIK**

Very good Installation Team, neat job we will not hesitate to recommend B&C to other clubs.

- **ROBERT HUMPHREYS - GROUNDSMAN  
NANTLLE VALE FC**

Just wanted to say what a great job you completed yesterday, team was on time and had a miserable day in the rain and the wind. Please pass on our thanks to them. I am sure our residents will appreciate having some shelter now the bad weather is here.

- **COLEBY PARISH COUNCIL**

Everything was done to an extremely high standard, the fitting team were both very friendly and efficient.

A job very well done!

- **SUNNINGDALE PARISH COUNCIL**

The fitting team made an excellent job of erecting the shelter, including placing up warning signs. All in all very helpful and arrived at the arranged time.

- **HECK PARISH COUNCIL**
